*"Your Ingredient Source"*

Amino Acids have been produced either by chemical synthesis, fermentation, or hydrolysis from duck feather. To promote sustainability in our environment, PAT Vitamins now supplies Amino Acids produced via the plant fermentation process. Starting with a by-product from glucose manufacturing, by utilizing advanced micro bio-fermentation process, our original manufacturer is able to ensure the productive use of natural resources.

### Amino Acids via Plant Fermentation

- L-Glutamine
- L-Leucine
- L-Isoleucine
- L-Valine
- Instant BCAAs

### Other Amino Acids

- L-Arginine
- L-Arginine AKG
- L-Carnitine
- L-Citrulline
- L-Citrulline DL-Malate
- Creatine Anhydrous and Monohydrate
- L-Cysteine Hydrochloride
- L-Glutamic Acid
- Glycine
- L-Histidine
- L-Lysine Hydrochloride
- Methionine
- L-Proline
- Taurine
- L-Theanine
- L-Threonine
- L-Tryptophan
- L-Tyrosine
